

CLINICAL-YEAR SUPPLIES

Highly Recommended/Regularly Used - Clothing

- Short-sleeved/long-sleeved coveralls: 1-2 pair; more might be necessary if large animal-focused. Needed for Necropsy, Theriogenology, Food Animal blocks (not equine); could potentially borrow from a friend while on these blocks (would need to make sure friend isn't in similar rotations), but may need several pairs a day (especially for Poultry)
- Scrub sets: "ciel blue" is the color designated for student scrubs; 2-5 pair (average of 3) recommended; consider borrowing from a friend when on Anesthesia or Surgery, which may require 2-pair a day at times or more
 - Will use scrubs most on SA/LA surgeries and Anesthesia, but will also use scrubs on rotations such as: Ophthalmology, Neurology, General Practice, Radiology, Ultrasound, Necropsy, Emergency, etc.
- Lab coats: 2-3
- Shoes: close-toed shoes are preferred/required by most of the clinics, and comfortable shoes are recommended
 - Rubber boots will be needed for Necropsy
- Professional dress: when on a block with client interaction, students are expected to dress in professional attire unless in surgery/prep (see Dress Code SOP for details)

Highly Recommended/Regularly Used - Materials

- Thermometer: 1-2, digital is recommended, the faster the better
- Stethoscope
- Pen light
- Watch (with a second hand)
- Small calculator
- Bandage scissors
- Small notebook: for notes about patients; nice for sticking labels with patient info
- Hemostats: for Neurology and for removing tight IV lines
- Hoof pick: for LA hospital

Bonus/Student-Recommended

- Snacks to leave in locker for late nights
- Reflex hammer – for neurology, orthopedics, medicine
- Suture scissors
- Clogs for surgery
- Fanny-pack – for Anesthesia and LA blocks
- USB flash drive or something to take home SOAP notes
- Palm Pilot – useful for Papich Formulary
- Otoscope/ophthalmoscope
- Lens for indirect ophthalmoscopy
- Goniometer – for SA Orthopedics with Dr. Marcellin!

The amount of clothing needed will depend on your area of interest, the frequency of laundry being done, and your ability to keep clean! Labeling your belongings will help your items stay with you.
