

NC STATE Veterinary Hospital

Your Dog Can Help Save Lives!

Canine blood donors are needed to join our program! Our Small Animal Blood Bank is the lifeline for dogs in emergency situations. Every **one unit** of blood collected can help save up to **four dogs' lives**, saving thousands of lives every year.

Is Your Furry Friend a Paw-fect Match?

- 1 - 5 years old
- At least 50 pounds
- In good health
- Easy-going temperament*

**We need our furry friends to be still during the donation collection process, which typically lasts 20 minutes or so. So, we're looking for laid-back canines that don't mind a free 20 minute belly rub!*

Benefits for donors and their owners:

- + Free in-depth health screening to determine eligibility
- + Annual vaccinations, and flea, tick, and heartworm prevention free-of-charge
- + Free annual physical exam by clinician
- + Saving canine lives
