

# IS YOUR DOG 5 YEARS OR OLDER AND MORE THAN 22 POUNDS?

*The Translational Research in Pain (TRiP) Program of NC State University College of Veterinary Medicine wants your dog to join a special study!*

**This study explores the connection between the GI system and joint health.**

**Just 2 visits in 2 weeks!** During these visits, you and your dog will receive:

- Free comprehensive exams (including neurologic and orthopedic)
- Free comprehensive lab work (CBC/Chem/UA)
- Free full-body radiographs!
- All findings and diagnoses sent to your Primary Veterinarian
- A goodie bag with up to \$100 in Amazon gift cards, and a FREE TOY!

Join us in this exciting journey to uncover more about dogs' health. Your furry friend could make a real difference! Your pups will be in good hands with our Fear Free Certified Team! We care for every patient like they are our own, just ask the pups in these photos!

Interested? Fill out our initial questionnaire.

We'll get in touch!
