

RECRUITING

Cats with Oral Cancer

NC State College of Veterinary Medicine is recruiting cats with **oral squamous cell carcinoma (SCC)**.

In this clinical trial, all cats will be treated with standard radiation therapy (RT). Some cats will also receive a novel radiation-enhancing drug.

PARTICIPATION

- You will be required to bring your cat to the NC State Veterinary Hospital for:
 - 1 screening visit,
 - 3 radiation treatment sessions, and
 - A series of recheck visits (1 and 2 weeks after RT, then once monthly).

STUDY BENEFITS

- All required testing and treatment will be provided by our team of veterinary oncology experts, at no cost to you. Total estimated value: \$8,500.

INCLUSION CRITERIA

- Eligible cats must:
 - Have a pathologically-confirmed diagnosis of oral SCC (*any location in the mouth*)
 - Be otherwise healthy (*as assessed via physical exam, bloodwork, and imaging*)
 - Have had no prior treatment with either chemotherapy or RT
