

Does your dog suffer from Atopic Dermatitis?

Do you have a dog suffering from **Atopic Dermatitis**? **NC State Dermatology** is conducting a clinical trial to evaluate a **new injectable medication** similar to Xolair® (Omalizumab), which may provide relief for **weeks to months**.

PARTICIPATION

- Patients will be required to come to NCSU for 8 study visits over the course of 16 weeks.
- Owners must closely monitor their dog at home and record in an Owner Diary.

This study is FULLY FUNDED

- ✓ Physical exams
- ✓ Bloodwork & urinalysis
- ✓ Three doses of the injectable medication
- ✓ **Free serum allergy testing**

INCLUSION CRITERIA

- ✓ Must have **well-controlled NON-SEASONAL atopic dermatitis**
- ✓ **Food allergies must be ruled out**
- ✓ Must be on **flea prevention** for the duration of the study
- ✗ **Current Cytopoint treatment and previous immunotherapy are NOT allowed**
- ✗ **under 25 kg/55 lbs**
